# Åtta.45 Printers Stockholm, Sweden

Åtta.45 Tryckeri is one of the largest printers in Sweden that offer total solutions for graphic services. About 80 employees work with everything from originals and prepress to offset printing, post treatment and direct marketing services.

"Before the air was measured by Zehnder we were not aware of the fact that our work environment was so dirty," says Tomas Olsson, print shop manager at Åtta.45 Tryckeri. "We work in an industrial building with a lot of machines that stir up dust, such as four printing presses and four folding and stapling machines. We also have a paper store that creates a lot of dust. Last but not least we add a thin layer of powder between each sheet so that the colours do not smear when the sheet is printed. This powder creates a lot of dust."

The print shop, which is about 3500 square meters, was equipped with four E12000 air cleaner units from Zehnder Clean Air Solutions.

"There was a distinct difference from one day to the other, and several employees said the same thing. The air feels so much cleaner and fresher. The air cleaner units have been installed about a year now, and we are very happy. And nobody is doubting that they are very useful. The filters in the units have to be replaced every year, but ours are clogged after eight months. It is plain to see that Zehnder Clean Air Solutions makes a big difference," says Tomas Olsson.

FACTS	
<b>Company:</b>	Åtta.45 tryckeri
<b>Installed products:</b>	4 x E12000
<b>Dust reduction after installation:</b>	78 %
<b>Dust source:</b>	Printing activity, printing powder, paper stock
